

SSLP Group Ltd are Cyber Essentials, ISO27001, GDPR and DPA 2018 compliant. Our business practices around security and privacy compliance remain and always will remain, a fundamental part of the service we provide.

In the event of a UK exit (assuming the UK leaves the EU), the UK will become a “Third Country” under GDPR definition.

SSLP Group confirms that, where it concerns “appropriate safeguards” under GDPR;

- We undertake an analysis of the risks presented by our processing and use this to assess the appropriate level of security we need to put in place.
- When deciding what measures to implement, we take account of the state of the art and costs of implementation.
- We have an information security policy and take steps to make sure the policy is implemented.
- We have additional policies and ensure that controls are in place to enforce them.
- We make sure that we regularly review our information security policies and measures and, where necessary, improve them.
- We have put in place basic technical controls such as those specified by established frameworks; for instance, Cyber Essentials and ISO27001.
- We understand that we may also need to put other technical measures in place depending on our circumstances and the type of personal data we process.
- We use encryption and/or pseudonymisation where it is appropriate to do so.
- We understand the requirements of confidentiality, integrity and availability for the personal data we process.
- We make sure that we can restore access to personal data in the event of any incidents, such as by implementing the appropriate backup process.
- We conduct regular testing and reviews of our measures to ensure they remain effective, and act on the results of those tests where they highlight areas for improvement.
- Where appropriate, we implement measures that adhere to an approved code of conduct or certification mechanism.
- We ensure that any data processor we use (such as a datacentre) also implements appropriate technical and organisational measures.
