

Secure email. Simple, encrypted file transfer

Exchange sensitive information securely with SSLPost

Businesses around the world recognise the importance of communicating sensitive information securely. Standard email over the internet is not secure enough to protect the sender and recipient from malicious attack, human error or repudiation.

SSLPost secure email locks up your sensitive documents from the point of issue to the point of opening; using encryption to International Standards. This easy-to-use web app secures those communications from prying eyes and underpins your data protection policies.

Ideal for:

- ✓ Mobile & distributed workforce
- ✓ Sensitive/confidential documents
- ✓ Business/HR documentation

Benefits:

- ✓ Data protection compliance
- ✓ Save cost and time
- ✓ Supports environmental policies

Features:

- ✓ Full audit trail via dashboard
- ✓ Flexible options to suit your business
- ✓ No change to email provider needed

Why choose SSLPost secure email?

- ✓ Send messages, files, documents and very large files, securely.
- ✓ No email attachment restrictions.
- ✓ Suitable for file sizes greater than 4GB (standard mailbox restriction).
- ✓ Includes full audit trail for track and trace.
- ✓ Easily revoke access to message sent in error.
- ✓ Option to set time limit for recipient to open the email and access the attachments.
- ✓ Option for track and trace only; no encryption or password needed to access email contents.
- ✓ Configure auto encryption of attachments via SSLP365 Outlook Add-In.
- ✓ Brandable to suit your company identity.
- ✓ No software, app or download required by recipient.

Making compliance easy

Security of personal information is extremely important. When you choose an SSLPost solution, you are choosing to secure your data using enterprise-level encryption. Whether the data is in transit between a business and an employee or at rest on the server, your data is locked up tight using one of the best encryption technologies available in the world today.

Our datacentre is ISO/IEC 27001 accredited. However, more importantly, **so are we**. This means we follow data security best practice from development through to delivery.

How it works

SSLPost secure email is flexible. As your business develops, the solution can be adapted to suit your changing needs. And the best bit? You can keep your current email software provider; our solution integrates into your current infrastructure allowing access to secure email, whenever you need it.
