- ✓ Configure auto encryption of attachments locally or centrally
- ✓ Brandable to suit your company identity.
- ✓ No software, app or download required by recipient.
- ✓ Quick, easy and User intuitive.

Making compliance easy

Security of personal information is extremely important. When you choose an SSLPost solution, you are choosing to secure your data using enterprise-level encryption. Whether the data is in transit between a business and an employee or at rest on the server, your data is locked up tight using one of the best encryption technologies available in the world today.

Our datacentre is ISO/IEC 27001 accredited. However, more importantly, **so are we**. This means we follow data security best practice from development through to delivery.

How it works

SSLP 365 Outlook Add-In is flexible, robust and more importantly, secure. And the best bit? You can keep your current email software provider; **our solution integrates into your current infrastructure** allowing access to secure email, whenever you need it.
