Your work stuff, all in one place

A simple solution to manage your workplace applications

Designed for mobile use, **myworksapp** enables employees to access all their key workplace applications in one place via a simple, app-based user interface.

Let's face it, no one has time to search out what they need at that very moment; they just want easy access at any time, from anywhere and for everything to be in one place.

myworksapp presents the ELMhub solution via a mobile app that enables direct push messaging to users in addition to the huge benefits of your ELMhub.

Employees simply open **myworksapp** on their mobile and access all documents and services including epayslips, P60s, P11Ds, HR and auto enrolment communications, work emails, secure email, documents requiring esign, workplace pension, employee benefits, HR portal or intranet logins.

Accessibility for all is important so we offer choices of presentation screens including those suitable for SEND or ESL employees.

myworksapp benefits

- ➢ Access to all workplace applications in one place
- ➢ Push messaging for immediate conversations and notifications
- ➢ Ideal for SEND and ESL users
- ➢ Easy and intuitive to use
- ➢ Designed for mobile devices
- ➢ Convenient, 24/7/365 access
- ➢ Secure and safe
- ➢ Can support Single Sign-On
- ➢ Hosted on secure servers at ISO27001 and Cyber Essentials certified provider
- ➢ Option for Multi Factor Authentication (MFA)

Adapting **myworksapp** for your business

myworksapp is provided with two standard "tiles".

- ✓ **my works pay** – epayslips and pay documents
- ✓ **my settings** – ELMhub settings

Just add your requirements*, for example:

- ✓ HR communications
- ✓ work email
- ✓ workplace pension
- ✓ employee benefits
- ✓ HR platform for absence management
- ✓ expenses
- ✓ timesheets
- ✓ shift patterns
- ✓ mileage trackers
- ✓ company intranet
- ✓ company website
- ✓ contracts & terms
- ✓ policies
- ✓ user guides
- ✓ any other web-based solutions you use.

*one link per option, per company

What's the difference between **myworksapp** & the standard ELMhub?

ELMhub is the Employee Lifecycle Management solution. There are two options available to surface this to employees; **myworksapp** is an app-based solution **with the added benefit of push messaging.**

Some clients prefer the app-based approach to accessing their ELMhub, some prefer the simplicity of web access which comes as standard with ELMhub. We provide both options, so you have a choice.
